A digital artwork featuring a blue and white dragon flying over a desert landscape with a large, ornate building in the background. The dragon is the central focus, flying towards the right. The background shows a vast, arid landscape with a large, ornate building with multiple spires and towers, possibly a palace or a temple, situated on a hill. The sky is filled with soft, white clouds, and the overall lighting is bright and natural.

He sent **large-scale humanitarian relief operations to Gaza** during the war in Israel, while calling for a two-state solution: The United Nations sent between **100 and 500 trucks per day to support Israel with food and medicine** since the beginning of the conflict. UNRWA and UNHCR relocated victims of the war in hospitals, schools and shelters. Repeatedly suffered the loss of United Nations activists and service members. He went himself to the border when trucks were blocked in Egypt and could not deliver aid, sending international calls for new morals and cooperation. *“We need rapid, safe, unhindered, expanded and sustained humanitarian access into and across Gaza”*. COP29 climate talks end with \$300 billion annual pledge, Guterres calls deal a 'base to build on'

Additionally to solving problems, **the United Nations have been leaders for prevention and information, organizing capacity-building workshops all around the world** in partnerships with corporations such as BMW, and events such as the Summit Of The Future, the Global Summit for Artificial Intelligence, or the High-Level Political Forum on Sustainable Development. These are regular incentives to gather activists and establish world-changing strategies, guide on the next step to take at local and global scales.

He is the only person I have ever heard standing at the General Assembly to denounce the **scandal and threat of nuclear weapons**. We have established a **nuclear removal plan** involving worldwide embassies and engineering trainings to facilitate the energy transition and **redirect the focus from wars to the Space Olympics 2030**. "THIS IS NOT THE TIME TO SLOW DOWN". SGAG

Amongst all this, he never gave up. He travelled to witness and report the melting glaciers in Nepal, the Antarctic ice loss, torrential rains and flash floods in Tonga, or raising sea level in Samoa, spreading awareness and organizing Summits and conferences about Climate Action. In every country, we have taken measures to limit the pace of global warming by starting the energy transition, creating electric cars stations and replacing lead pipes and avoid sanitary and health damages.
